

Pureⁿ-B H₂O

Trace Moisture Analyzer for Ultra-High Purity Gases

Introduction

The Pureⁿ-B H₂O Analyzer is an ultra-sensitive analysis instrument with a simple structure, superior performance, wide dynamic range and low price. The core technology is optical cavity ring-down spectroscopy (CRDS). CRDS technology is an absolute measurement method, the measurement is reliable and accurate, and does not require calibration at the same time. The analyzer can free users from cumbersome sensor maintenance, hassle calibration procedure, and replacement of hardware. The Pureⁿ-B H₂O analyzer's lower detection limit can be as low as 1.2ppb.

- The Pureⁿ-B H₂O analyzer can measure many kinds of gases, trace moisture in noble gases and corrosive gases can all be measured.
- Inner Mongolia Photonics Technologies Co. is right by your side. Our company could custom-made analyzers for you. We provide professional pre-sales consultation, implement strict inspection standards, and provide customers with quick and high quality after-sales service.
